

St Katharine's CE Primary School

Computing Progression Pathway

Computing Vision

We want all children to be prepared for their future, recognising how technology is an aid to learning; demonstrate an understanding of how to be safe and confident users of technology; and be creative and innovative learners.

A learner in Computing will:

- Use technology safely, respectfully and responsibly.
- Understand how to remain safe online.
- Analyse and solve relevant and worthwhile problems in computational terms.
- Be able to adapt easily to the information technology systems and approaches they will encounter in their future lives.
- Use logical reasoning to explain.
- Recognise common uses of information technology, both in and beyond school.
- Understand and apply the fundamental principles and concepts of computer science, including abstraction, logic, algorithms and data representation.

Computing at St Katharine's has been broken down into 4 strands and 8 Key Concepts:

Each child will develop key skills in all four strands within Computing lessons during their time at St Katharine's.

The 4 Strands

The Computing curriculum will need to be altered year-on-year to meet children's needs and to keep pace with new technology, but maintain structure so children learn core skills and build on their previous experiences. To achieve this, Computing at St Katharine's has been broken down into 4 strands; each child will develop key skills in all four strands within Computing lessons during their time at St Katharine's.

<p>Digital Literacy</p>  <p>Children are taught the necessary skills to become digitally literate - able to use and express themselves and develop their ideas through information and communication technology - at a level suitable for the future workplace and as active participants in a digital world.</p>	<p>Video/Photography</p>  <p>Children are taught artistic, photographic and film making skills, including animation, and learn how these can be developed into useful and career enhancing job skills.</p>
<p>Computer Science</p>  <p>Children are taught the principles of information and computation, how digital systems work, and how to put this knowledge to use through programming.</p> <p>They are also provided with the necessary skills to problem solve and become logical thinkers.</p>	<p>E-Safety</p>  <p>Children are taught how to stay safe when using technology within Computing lessons, in addition to stand-alone lessons throughout the year linking to the PSHE Curriculum.</p> <p>Additional E-Safety lessons take place during Internet Safety Week.</p>

In addition to Computing lessons, the use of technology is incorporated across the curriculum, reinforcing the teaching of essential skills for life and enabling learners to participate more readily and safely in a rapidly changing digital world.

E-Safety

Using the UK Council for Child Internet Safety (UKCCIS) framework, children will be introduced to eight different aspects of online education through Computing lessons during their time at St Katharine's.

Self-image and Identity

Online Relationships

Online Reputation

Online Bullying

Managing Online Information

Health, Wellbeing and Lifestyle

Privacy and Security

Copyright and Ownership

These are taught alongside projects as part of Computing lessons where appropriate and through stand-alone E-Safety lessons, linking to the PSHE curriculum.

Additional E-Safety lessons take place during Internet Safety Week.

Computing Overview

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Autumn Term	All About Algorithms	The BIG Adventure	Aesop's Fables Animation	The Firework Maker's Daughter	Kensuke's Kingdom	Autumn Enterprise
	Online Relationships	Privacy and Security	Privacy and Security	Online Bullying	Online Reputation	Self-image and Identity
Spring Term	Dinosaurs	Anima-L-tion	Digimaps	Out of this World	The Science of Data	Game-On
	Safer Internet Day	Safer Internet Day	Safer Internet Day	Safer Internet Day	Safer Internet Day	Safer Internet Day
Summer Term	E-Book	Fit for Life	Recipe Writing	Seashore Book	Kick	Summer Enterprise
	Online Relationships	Privacy and Security	Privacy and Security	Online Bullying	Online Reputation	Self-image and Identity

EYFS	Focus	Curriculum Content	Skills	Vocabulary
 E-Safety	 Online Relationships This strand explores how technology shapes communication styles and identifies strategies for positive relationships in online communities. It offers opportunities to discuss relationships and behaviours that may lead to harm and how positive online interaction can empower and amplify voice.	<p>Technology: children recognise that a range of technology is used in places such as homes and schools. They select and use technology for particular purposes.</p> <p>Understanding the world involves guiding children to make sense of their physical world and their community through opportunities to explore, observe and find out about people, places, technology and the environment.</p> <p>Expressive arts and design involves enabling children to explore and play with a wide range of media and materials, as well as providing opportunities and encouragement for sharing their thoughts, ideas and feelings through a variety of activities in art, music, movement, dance, role-play, and design and technology</p>	<p>Children recognise the impact of good choices and consequences of wrong ones.</p> <p>They can select and use technology for a purpose.</p> <p>Children understand that they must ask an adult whether they can use a game or app.</p> <p>Children know that information can be retrieved from computers and can tell an adult if what they see makes them feel worried.</p> <p>Children recognise who they can ask for help and know when they need help.</p> <p>Children understand that they need to share equipment and take turns.</p>	E-Safety Online Relationships Behaviours Game App Ask / Tell Share
